Ahmedabad, India

Professional Summary

BCA graduate from Silver Oak University with hands-on experience in web and software development and a strong interest in full-stack application development. Currently completing a 6-month stipend-based internship at Emperor Smart Solution as a MERN Stack Developer, working with modern web technologies, databases, development tools, and AI-assisted development workflows. Experienced in building responsive and animated websites, business applications, CRM systems, and administrative platforms.

Experience

MERN Stack Developer Intern	Emperor Smart Solution
6-Month Stipend-Based Internship	
- Develop and enhance web applications using the MERN stack with a focus on responsive interfaces, reusable components, and practical business requirements. - Work across frontend and backend development, including application logic, API integration, database operations, and website administration features. - Work with PostgreSQL, MySQL, and MongoDB databases while using Git for source-code management and VS Code and Antigravity IDE for development. - Build animated and interactive websites and contribute to projects involving PHP, Laravel, Flutter, and AI algorithms as part of a broader software-development workflow.	

Technical Skills

Frontend / Web	HTML, CSS, JavaScript, MERN Stack, Responsive Web Development, Animated Websites
Backend / Frameworks	Node.js, Express, PHP, Laravel
Databases	MongoDB, MySQL, PostgreSQL
Programming / Development	JavaScript, PHP, Flutter, AI Algorithms
Tools	Git, VS Code, Antigravity IDE
Soft Skills	Quick Learner, Problem Solving, Teamwork, Collaboration

Class 12th — Gujarat Board	2023
Second Class	
Class 10th — Gujarat Board	2021
First Class	

Projects

Millionaire Digital (MDZ) — 3D Animated Website

2026

A fully immersive 3D animated website created for Millionaire Digital (MDZ), a creative company specializing in photography, video shoots, event organization, and digital media services. The project focuses on premium presentation, interactive visuals, and a strong portfolio-driven user experience.

- Designed and developed a premium, modern interface to showcase creative services and portfolio content.
- Implemented immersive 3D visual presentation and smooth animated interactions to create an engaging browsing experience.
- Structured the website around clear service presentation, visual storytelling, and easy navigation.
- Built the experience with responsive web principles so the presentation can adapt across different screen sizes.

Nexora CRM — Lead & Customer Management System

2026

A custom CRM platform designed to manage the complete customer and lead lifecycle. Nexora helps teams capture leads and move them through business stages including Sales, Resume Team, Marketing, and Placement.

- Developed a centralized system for capturing, organizing, and tracking leads and customer information.
- Implemented business-stage workflows covering Sales, Resume Team, Marketing, and Placement operations.
- Created management functionality that helps teams monitor customer progress and streamline internal workflows.
- Organized the application around a scalable structure suitable for day-to-day business and team collaboration.

Emperor Media Solution — Marketing Website & Admin Panel

2026

A modern marketing website developed for Emperor Smart Solution together with a custom admin panel for managing website content and designs. The platform includes 30+ customizable templates and is structured to support different client requirements.

- Developed a premium marketing website focused on clear service presentation and modern visual design.
- Built an admin panel to create, edit, delete, switch, and manage website content and templates.
- Integrated 30+ customizable templates to support multiple website layouts and client-specific requirements.
- Designed the management architecture to simplify content updates and support scalable website administration.

Dental Website — UK

2026

A modern responsive dental website developed with PHP for a UK-based dental practice. The website provides a professional online presence with clear information about dental services, practice details, and straightforward navigation for patients.

- Developed a clean and professional interface suitable for a healthcare-focused business website.
- Implemented responsive layouts to provide a consistent experience across desktop and mobile devices.
- Structured service and practice information for clear presentation and easy patient navigation.
- Used PHP as the core development technology for the website implementation.

Additional Projects

Spotify Clone

2026 – Present

Responsive Spotify-inspired music streaming interface with music playback controls including play, pause, next, previous, and progress-bar functionality.

- Built a responsive music interface using HTML, CSS, and JavaScript.
- Implemented core playback controls and progress interaction.

E-Commerce Website

2025

Functional e-commerce platform with product listing, shopping cart, checkout, user authentication, and order management.

- Developed product browsing and cart functionality.
- Implemented authentication and order-management features.

Technical Profile

- **MERN Stack:** Practical internship experience developing full-stack web applications and business systems.
- **PHP / Laravel:** Experience working with PHP-based web development and Laravel projects.
- **Flutter:** Exposure to application development using Flutter.
- **Databases:** Working knowledge of MongoDB, MySQL, and PostgreSQL for application data management.
- **Development Tools:** Git, VS Code, and Antigravity IDE for coding, version control, and AI-assisted development workflows.
- **AI Algorithms:** Practical exposure to using AI algorithms within software-development work.
- **Web Animation:** Experience creating animated and interactive website experiences with a focus on premium visual presentation.

Project Highlights

3D / Animated Web	Millionaire Digital (MDZ) — immersive 3D presentation, smooth interactions, and premium visual experience.
Business Applications	Nexora CRM — lead, customer, workflow, and team-stage management.
Admin Systems	Emperor Media Solution — 30+ templates with content and design management through a custom admin panel.
PHP Development	Dental Website — responsive PHP-based website for a UK dental practice.

Personal Details

Date of Birth	10/08/2006
Languages Known	English, Hindi, Gujarati
Location	Ahmedabad, India

Career Objective

To grow as a full-stack developer by applying practical MERN Stack and web-development experience to real-world products, while continuously improving software engineering, database, UI, and problem-solving skills.
